

About ProClass

Based on more than 15 years of experience, we are specialized in the management of technical documentation and CAD- services. ProClass consists of ProClass BV in the Netherlands and its 100% subsidiary ProClass Technologies Pvt. Ltd in India. ProClass delivers the following products and services:

ProCadd

With our 'Global CAD Centre' in India, we offer a complete CAD-outsourcing capability. Together with our Global CAD Centre specialists, ProClass offers you full support for all revision works on technical drawings. We have many types of CAD software and associated specialists in various disciplines available.

ProDocs

By accurately managing technical documentation such as drawings, certificates and procedures, ProDocs guarantees the availability of the correct document version. With ProDocs you automatically create searchable and classified documents which are stored centrally. This reinforces cooperation with colleague's and business partners, enabling them to keep track of changes and manage revisions directly.

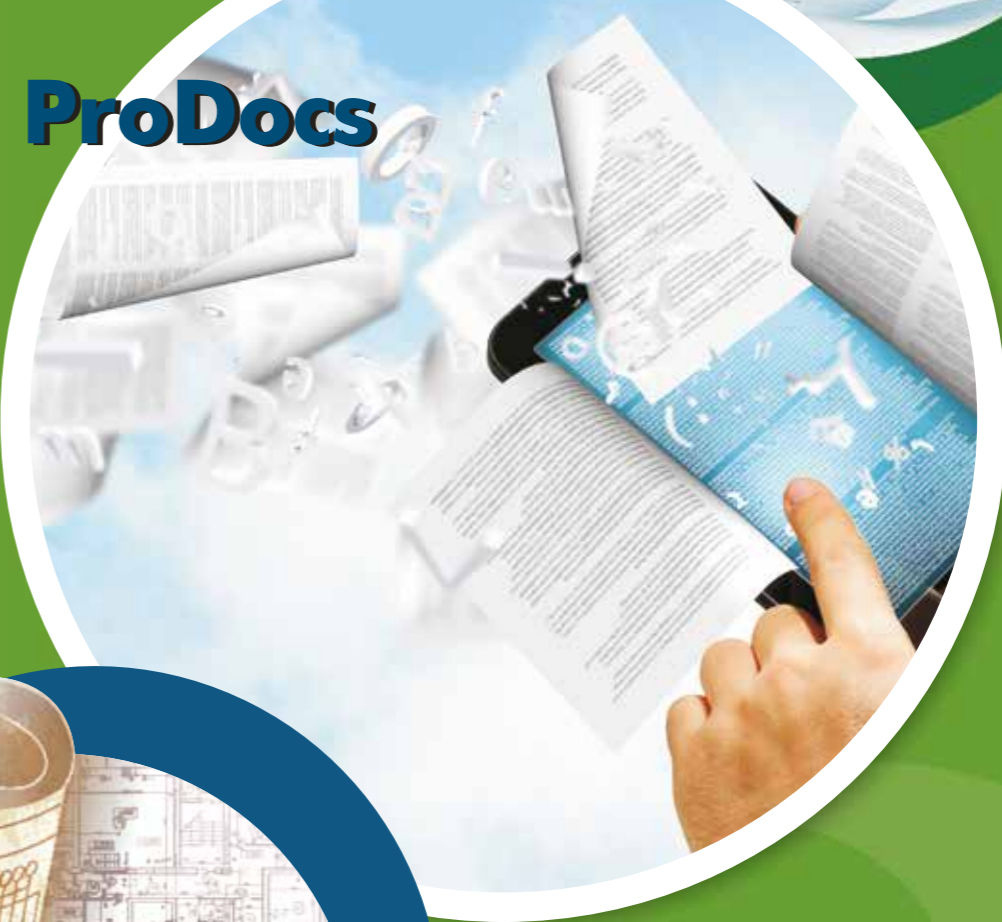

ProServices

ProClass is specialized in structuring and sorting out your documentation. By using our extensive knowledge and experience, we convert your hardcopy archive into a modern digital management system. ProClass digitizes your current archive using our own small and large sized scanners. By using the ProDocs software, we convert your files automatically into searchable and classified documents which can be stored in ProDocs or your own specific Document Management System.

Document Management System "ProDocs"
ProClass for all your technical documentation

Up-to-date technical documentation available, where- and whenever you need

By effectively managing technical documentation such as drawings, certificates and procedures, ProDocs guarantees you always have the right document version available. With ProDocs you automatically create searchable and classified documents, which are stored centrally. This reinforces cooperation with colleague's and business partners, enabling them to keep track of changes and manage revisions directly.

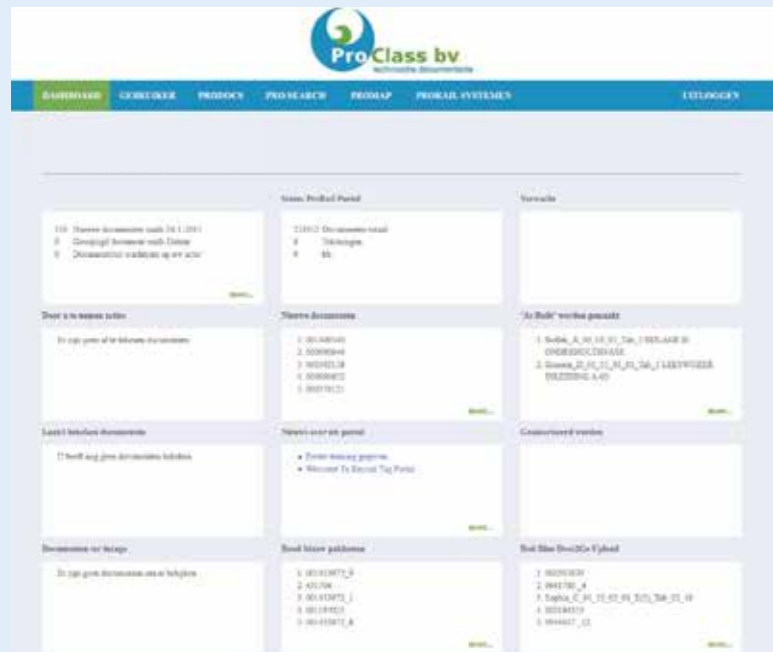

ProDocs is completely 'browser compatible' and can be used at any time on virtually all devices. Your technical documentation will be stored securely in our own data centre. Our daily backup procedure guarantees that not a single revision will be lost.

Why ProDocs?

By using ProDocs, your technical documentation is always structured and ordered. You not only save time and money, you also comply with legal guidelines and regulations.

- Documents accessible at any time;
- Efficient revision control using the ProDocs dashboard;
- Field notes displayed instantaneously;
- Maximum data security;
- Quickly finalize your Management of Change procedure;
- Efficient cooperation;
- No time-consuming searches;
- Up to 3 revisions available;
- Technical documentation safely stored;
- Integrated Global Cad Centre in India.

Dashboard ProDocs

ProClass maintains Technical Documentation according to legal guidelines.

Dashboard

Document changes are tracked and displayed by a user-friendly dashboard. Using this dashboard you can easily monitor the documents in process.

Notifications

Automatically generated notifications inform all stakeholders about the most recent comments and changes.

Easy to find

Unnecessary time-consuming document searches are no longer necessary. ProDocs converts your documents into a searchable PDF/A version.

Actual as built status

ProDocs isn't solely a Document Management System, but a fully integrated process aiming to facilitate efficient cooperation. You can directly put comments on the appropriate drawing. By using our special "DigiPen", the CAD-engineer can incorporate revisions quickly. Revised documents will be processed in a limited time frame. All stakeholders will always have the correct information available. This is an important contribution to safety!

ProClass offers you ProCadd, a service to outsource the revision process completely. Using the support of our specialists at the integrated Global Cad Centre in India, we can deliver an accurate As Built Status.

Security

Your technical documentation will be safely stored at our own data centre in Dordrecht. All communications and data is encrypted according to SHA2 certification.

Permission management

You control the access permissions of your personnel and/or contractors and you will have the ability to provide (limited) access to your documentation.

Rules and regulations

You comply with legislation and regulation by up-to-date documentation.
